TECHNICAL SKILLS

- **Languages:** Python, SQL, JS, HTML&CSS
- **ML:** Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch, MLflow
- **Data:** ETL, Airflow, feature engineering, pipelines
- **Backend:** Django, FastAPI, REST APIs
- **Cloud:** Docker, AWS (basics), Linux
- **DB:** PostgreSQL, MySQL, MSSQL
- **Tools:** Git, debugging, optimization
- **Methodology:** Agile (Scrum, Kanban)

CORE STRENGTHS

- Strategic problem-solving
- Ownership & Responsibility
- Team Collaboration
- Communication

INTERESTS

- Artificial Intelligence & LLMs
- System Design & Architecture
- Ethical hacking

Machine Learning Engineer

Machine Learning Engineer with a strong backend engineering background and experience building end-to-end data-driven systems. Skilled in Python, data pipelines, and scalable ML solutions. Experienced in designing APIs, processing large-scale datasets, and integrating ML models into enterprise systems. Currently focused on LLMs and AI agents.

EXPERIENCE

Machine Learning Engineer & Data Engineer — Postbank

2025 – Present

- Built machine learning solutions for credit scoring, segmentation predictive modeling
- Performed feature engineering and evaluation on large datasets
- Built and maintained data pipelines and deployment workflows
- Integrated models into enterprise systems
- Improved performance via feature selection and tuning
- Collaborated with business teams on data-driven solutions
- Mentored team members and shared best practices

Backend Developer — Haemimont AD

2023 – 2025

- Designed RESTful APIs for large-scale data workflows
- Built data processing and validation pipelines
- Optimized backend performance and response time
- Integrated data-driven features into production systems
- Migrated legacy components to improved architecture

EDUCATION

AI & LLM Engineering — SoftUni

2025 – Present

- Working with LLM frameworks such as LangChain, LangGraph, Claude; Building AI agents and exploring real-world use cases; Integrating LLMs into applications and workflows

Machine Learning & Data Science & Deep Learning — SoftUni

2024 – 2025

- Covered core ML concepts: supervised/unsupervised learning, model evaluation; Worked with data preprocessing, feature engineering, and model building; Explored deep learning fundamentals

Software Engineering with Python — SoftUni

2022 – 2023

- Built backend applications using Python; Worked with databases, REST APIs, and web frameworks; Developed full-stack project experience

Bachelor's Degree in Bulgarian Language and History

University of Veliko Tarnovo

- Pedagogical background with strong communication and analytical skills

LANGUAGES

Bulgarian — Native English — Professional Working Proficiency
