TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, HTML/CSS

ML: Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch, MLflow

Data: ETL, Airflow, feature engineering, pipelines

Backend: Django, FastAPI, REST APIs

Cloud: Docker, AWS (basics), Linux

DB: PostgreSQL, MySQL, MSSQL

Tools: Git, debugging, optimization

Methodology: Agile (Scrum, Kanban)

SOFT SKILLS

Problem Solving & Analytical Thinking

Ownership & Responsibility

Team Collaboration

Communication

Fast Learning & Adaptability

INTERESTS

Artificial Intelligence & LLMs

System Design & Architecture

Open-source projects

Science & Tech research

Machine Learning Engineer

Machine Learning Engineer with a strong backend engineering background and experience building end-to-end data-driven systems. Skilled in Python, data pipelines, and scalable ML solutions. Experienced in designing APIs, processing large-scale datasets, and integrating ML models into enterprise systems. Currently focused on LLMs and AI agents.

EXPERIENCE

Machine Learning Engineer / Data Scientist — Postbank

2025 – Present

- Developed ML models for risk scoring, segmentation, fraud detection
- Performed feature engineering and evaluation on large datasets
- Built and maintained data pipelines and deployment workflows
- Integrated models into enterprise systems
- Improved performance via feature selection and tuning
- Collaborated with business teams on data-driven solutions
- Mentored team members and shared best practices

Backend Developer — Haemimont AD

2023 – 2025

- Designed RESTful APIs for large-scale data workflows
- Built data processing and validation pipelines
- Optimized backend performance and response time
- Integrated data-driven features into production systems
- Migrated legacy components to improved architecture

EDUCATION

AI & LLM Engineering — SoftUni

2025 – Present

- Working with LLM frameworks such as LangChain, LangGraph, Claude
- Building AI agents and exploring real-world use cases
- Integrating LLMs into applications and workflows

Machine Learning & Data Science & Deep Learning — SoftUni

2024 – 2025

- Covered core ML concepts: supervised/unsupervised learning, model evaluation
- Worked with data preprocessing, feature engineering, and model building
- Explored deep learning fundamentals

Software Engineering with Python — SoftUni

2022 – 2023

- Built backend applications using Python
- Worked with databases, REST APIs, and web frameworks
- Developed full-stack project experience

Bachelor's Degree in Bulgarian Language and History

University of Veliko Tarnovo

- Pedagogical background with strong communication and analytical skills

LANGUAGES

Bulgarian — Native

English — Professional Working Proficiency
