Machine Learning Engineer | Data Engineer | Data Scientist

Machine Learning Engineer with strong backend engineering background and experience building end-to-end data-driven systems. Skilled in Python, data pipelines, and scalable ML solutions. Experienced in designing APIs, processing large-scale datasets, and integrating ML models into enterprise systems. Currently focused on LLMs and AI agents.

Technical Skills

- Programming: Python, SQL, JavaScript, HTML&CSS
- Machine Learning & Data: Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch, MLflow, feature engineering, model evaluation
- Data Engineering: ETL pipelines, data preprocessing, workflow orchestration (Airflow), batch processing
- Backend & APIs: Django, FastAPI, RESTful services, microservices architecture,API design
- Cloud & DevOps: Docker, AWS (basics), Linux, CI/CD fundamentals
- Databases: PostgreSQL, MySQL, MSSQL
- Tools & Workflow: Git, debugging, performance optimization
- Methodologies: Agile (Scrum, Kanban)

Experience

2023– 2025

Backend Developer – Haemimont AD

• Designed and implemented RESTful APIs handling large-scale data processing workflows
• Built data processing pipelines for transforming and validating structured datasets
• Optimized backend services, improving response time
• Collaborated on integrating data-driven features into production systems
• Led migration of legacy components to improved architecture

2025 – Present

Machine Learning Engineer / Data Scientist – Postbank

• Developed and maintained machine learning models for risk scoring, customer segmentation, fraud detection
• Performed data preprocessing, feature engineering, and model evaluation on large structured datasets
• Collaborated with business teams to translate requirements into data-driven solutions
• Build and maintain data pipelines and model deployment workflows for scalable, secure AI system
• Improved model performance through feature selection and tuning
• Contributed to integrating models into internal systems
• Mentored team members and shared best practices in data processing and model development

Education

Bachelor's Degree in Bulgarian Language and History – University of Veliko Tarnovo, Bulgaria

- Pedagogical background with strong communication and analytical skills

Professional Training & Certifications

2025 – Present

AI & LLM Engineering – SoftUni

- Working with LLM frameworks such as LangChain, Claude
- Building AI agents and exploring real-world use cases
- Integrating LLMs into applications and workflows

2025 – Present

Machine Learning & Data Science & Deep Learning – SoftUni

- Covered core ML concepts: supervised/unsupervised learning, model evaluation
- Worked with data preprocessing, feature engineering, and model building
- Explored deep learning fundamentals

2022 – 2023

Python Web Developer – SoftUni

- Built backend applications using Python
- Worked with databases, REST APIs, and web frameworks
- Developed full-stack project experience

Languages

- Bulgarian — Native
- English — Professional Working Proficiency
